FAQs

Q: What is the ISE?

A: ISE is our In-Store Execution program. Whole Foods Market will start charging a fee for all Grocery products for qualifying suppliers on 4/1/18 and all Whole Body products for qualifying suppliers on 7/1/18. This fee will be used to cover the cost of services such as category resets, new store/ remodel support, revisions and “cut ins”, planogram auditing, dedicated category manager support, portal access, and Whole Body education program.

Q: What makes me a qualifying supplier?

A: Any supplier providing for that \$300,000 in branded sales to Whole Foods Market in a 52 week period qualifies for this program.

Q: Are there any exclusions to this program?

A: Yes, we will not charge a fee for any private label or control label product. We will also exclude any products sold in our Specialty or Perishables departments.

Q: Why am I seeing my ISE deduction come through with multiple deduction codes and amounts?

A: Some of our suppliers have opted to have the full fee broken out by code. The three codes are for In Store Execution, Planogram Auditing, and Dedicated Category Manager Support and correspond to the contract. Whole Body Suppliers may also see a code for Educational Platform. The deductions equal the total contractual

Q: How often will I see an ISE deduction?

A: We will do a monthly calculation for ISE deductions and you will see it come through the month after the calculation period. For example, we will calculate April's fee in early May and you will see it in mid to late May.

Q: What cost will be used as the basis for the deduction?

A: We will use your regular/ undiscounted cost on the first day of the month for each UNFI DC. If UNFI picks up at your location, this will be the FOB supplier cost. If you deliver to UNFI, it will be the delivered cost to each UNFI distribution center.

Q: Will we be charged for product returned or free fill?

A: No, the monthly calculation will exclude any returned product or free fill in that month.

Example: Total Shipments – (Product Returned) – (Free fill) = Total Units for Monthly Calculation

Q: Will I see any backup for this calculation?

A: Yes, we will be creating supplier files to be used as a tool for reconciliation. Each file will show the cost basis and amounts for each deduction at the item and UNFI DC level. These will be distributed by UNFI at the time of deduction. UNFI will also provide a deduction invoices and there will be one/ month for each deduction type.

Q: What if I have questions about the deduction?
